

Main features

- *The transducer has been improved in order to guarantee greater reliability under all conditions*
- *A sturdier structure makes the LT series even stronger for applications with heavy vibration*
- *Installation is made simpler by the absence of electrical signal variation in output, outside the Theoretical Electrical Stroke*
- *The new grooves provide an excellent alternative to the usual system of fastening with brackets*
- *Ideal for applications on plastic injection presses, vertical presses, and on many other processing machines*
